TECHNICAL SKILLS

- Project Management
- Networking
- Software Development

WORKTOOLS

- Microsoft 365 Word
- PowerPoint
- Capcut
- Canva

CORE WORK SKILLS

- Computer Literate
- Time management & organization
- Problem Solving
- Teamwork & Collaboration
- Attention to Detail
- Communication Skills
- Flexibility and Adaptability

PROFILE SUMMARY A First-Year Bachelor of Science in Information and Technology Student, with developing in Programming and Software Development. Learning Python activity hands-on based through academic purposes and personal learning. Have a knowledge on Networking and Maintenance but willing to learn more about on this field, since it can make me a better worker in the future.

EDUCATION

Bachelor of Science in Information Technology

PHINMA Cagayan De Oro College | 2025-Present

Secondary Education

Indahag National High School | 2019-2025

WORK EXPERIENCE

DICT 10 DTC Training Center - Immersion

Gen A. Luna St, Cagayan de Oro City | 2 weeks

- We learned how to use office tools such as Microsoft Word, Spreadsheet, and etc.
- We learned how to do maintenance on PC and its Hardwares
- We collaborated with another school.

PROJECTS

Financial Literacy Assistant for Students System | Python Scripting Project Computer

Programming 1 | November 25, 2025 PYTHON

Worked with a team to design and develop a mobile app to developed to assist college students in managing their personal finances effectively. It enables users to record daily transactions, track allowances, categorize expenses, and monitor overall financial activity in real time.

- To create a system that tracks students' allowances and expenses, organizes spending, and provides balance summaries.
- To promote financial literacy and responsible budgeting through helpful tips and guidance.
- To develop a user-friendly system that helps students track their finance and practice responsible money management.

INVENTORY TRACKER SYSTEM | Java/Console Project |

Computer Programming 2 | March 2026 - April 2026

Developed a Java-based Inventory Tracking System that helps business monitor stock levels, manage product information, and track inventory changes real in time.

- Implemented key features such as adding new products, viewing inventory lists, updating stock quantities/expiration dates, removing items, and tracking stock movement
- Utilized Java's built-in libraries like ArrayList and Scanner for efficient data handling and user input processing
- Design the system with a clean and intuitive console-based interface for easy navigation and real-time inventory monitoring

ACTIVITIES

Class Participation & Collaboration

PHINMA COC | November 2025

- Worked with our classmates to create a system that suitable and useful students.
- Attend group meetings and discussion of how to create the system.
- Created a Financial Literacy Assistant for Students System named "FINWISE"
